

NovaCorp Technologies Limited

Annual Financial & Operational Review · FY2024

1. Executive Summary & Financial Highlights

NovaCorp Technologies Limited delivered robust growth in Fiscal Year 2024, driven by accelerated digital logistics and cloud enterprise solutions. Consolidated revenue for FY2024 reached INR 1,250 Crores, representing a 27.5% year-on-year expansion compared to INR 980 Crores in FY2023. Operating profitability improved substantially, with Adjusted EBITDA reaching INR 225 Crores, representing an operating margin of 18.0%.

Table 1.1: Consolidated Financial Performance Metrics

Metric	FY2024 (Consolidated)	FY2023 (Consolidated)	YoY Change
Revenue from Operations	INR 1,250 Cr	INR 980 Cr	+27.5%
Adjusted EBITDA	INR 225 Cr	INR 155 Cr	+45.1%
EBITDA Margin	18.0%	15.8%	+220 bps
Active Full-Time Employees	8,500	7,100	+19.7%

2. Legal Entity & Scope Reconciliation

NovaCorp Technologies Limited reports both consolidated accounts (incorporating international logistics subsidiaries across Singapore and Dubai) and standalone accounts for core domestic operations. Standalone revenue for FY2024 stood at INR 1,120 Crores, compared to the consolidated figure of INR 1,250 Crores. The difference of INR 130 Crores corresponds directly to foreign operating subsidiaries. Readers should evaluate these figures in light of entity perimeter disclosures.

3. Outlook & Market Perception Indicator

According to an internal management assessment, the company's projected market expansion index is rated at 7.8. Note: The measurement methodology, baseline index unit, and comparative industry benchmarks were not defined at the time of publication and remain uncertified.

4. Human Capital and Workforce Corroboration

Human capital remains central to NovaCorp's engineering execution. As of March 31, 2024, the company employed a verified workforce of 8,500 full-time employees worldwide. Engineering, software development, and product architecture accounted for 54% of the total headcount, with customer logistics operations representing 36% and administrative services representing the remaining 10%.

5. Network Infrastructure and PIN Code Coverage

The national fulfillment network spanned 18,400 active PIN codes nationwide by the close of FY2024. During the year under review, the dedicated Tier-2 and Tier-3 rural expansion initiative added coverage across 1,200 new PIN codes. Stakeholders should distinguish between the total nationwide reach of 18,400 PIN codes and the incremental rural expansion reach of 1,200 PIN codes.

Table 2.1: Key Operational Statistics

Operational Dimension	Reported Value	Verification Scope
Total Global Headcount	8,500 employees	Consolidated (Page 1 & 2)
Nationwide Network Coverage	18,400 PIN codes	Total Postal Reach
Rural Expansion Increment	1,200 PIN codes	New FY2024 Phase 2
